NAHMS Poultry Studies

Last Modified:

The next NAHMS poultry study, tentatively planned for 2025, will provide important information about management and biosecurity practices used on U.S. small enterprise poultry operations. This national study will invite producers to participate from all 50 states and focus on operations with table egg layers (1,000 to 74,999 inventory), broilers (1,000 to 99,999 moved or sold annually), and meat turkeys (1,000 to 29,999 moved or sold annually).

Study Overview and background

- [Informational flyer](#) (360.47 KB)
- [Study Launch sheet](#) (388.74 KB)

Continue to check back during 2025 for additional information on the website.

In addition, NAHMS has conducted five studies on health and management practices on U.S. poultry operations: Layers 2013, Poultry 2010, Poultry Small Enterprise 2007, Poultry 2004, and Layers 1999.
