Commenting Opportunities: Facilitating Safe Agricultural Trade

Last Modified:

Tell us what you think!

As trade increases, so does the risk of spreading plant pests and animal diseases. Our experts analyze these risks and identify measures that will make trade safer and mitigate threats to U.S. agriculture. Your input in this process helps us make better-informed decisions about actions that may impact you.

Because safe trade and agricultural health are interconnected, be sure to check out our [plant health](#) and [animal health](#) commenting opportunities.
