NWRC Research Scientists: Dr. Aaron B. Shields

Last Modified:

Dr. Aaron Shields is a Project Leader and Research Scientist at the National Wildlife Research Center, Fort Collins, Colorado.

Research Project

[Methods and Strategies to Mitigate Rodent Impacts](#)

The goal of this project is to develop methods to reduce invasive and native rodent damage with both lethal and nonlethal approaches.

[Learn More](#)

Current Research

Dr. Shiels' current research is focused on developing and testing methods to reduce invasive and native rodent damage with both lethal and nonlethal approaches in island and continental ecosystems.

Research Interests

- Rodents
- Ecology and Management
- Conservation Biology
- Disturbance, Global Change
- Human-Wildlife Interactions
- Wildlife Damage Management
- Plant-Animal Interactions
- Invasive Species

Publications
