NWRC Research Areas: Laboratory Support Services Unit

Last Modified:

NWRC's Laboratory Support Services Unit (LSSU) supports the conceptualization and execution of laboratory activities prioritized by the research and operational arms of Wildlife Services.

LSSU also works with stakeholders including universities, public health departments, and the industry to develop and conduct research studies and diagnostic evaluations related to human-wildlife conflicts. Expertise in the LSSU is focused into three core areas: analytical chemistry, microbiology, and product formulation.
